Familiarizing yourself with these question types and practicing past papers enhances exam readiness.

Detailed Example from the June 2014 Paper

Let's analyze a representative example to understand the approach, calculations, and presentation involved.

Example Scenario

The following is a simplified version inspired by the June 2014 exam:

> The Trial Balance of ABC Traders as at 30 June 2014 shows the following balances:

Account	Debit (R)	Credit (R)
Cash	10,000	
Accounts Receivable	15,000	
Inventory	8,000	
Furniture and Fittings	20,000	
Accounts Payable		12,000
Capital		35,000
Purchases	50,000	
Sales		70,000
Salaries Expense	5,000	
Rent Expense	3,000	

Additional information:

- The inventory on hand at the end of June 2014 was R7,000.
- Salaries accrued but not paid amounted to R500.
- The furniture and fittings are to be depreciated by 10% per year.
- Insurance prepaid R1,200 expired during the year.
- The owner withdrew R2,000 for personal use.

Step-by-Step Solution Approach

- Preparing the Adjusted Trial Balance

Start by incorporating adjustments into the trial balance:

- Inventory Adjustment: Closing stock is R7,000.
- Accrued Salaries: R500.
- Depreciation: 10% of Furniture and Fittings (R20,000).
- Prepaid Expenses: Insurance R1,200.

- Calculating Adjustments

a) Closing Stock

- The inventory at year-end is R7,000.
- This figure will be used in the income statement.

b) Salaries Accrued

- Salaries Expense increases by R500.
- Salaries Payable (Liability) increases by R500.

c) Depreciation

- Furniture and Fittings depreciation = 10% of R20,000 = R2,000.
- This reduces the book value of Furniture and Fittings.

d) Insurance

- Insurance prepaid R1,200 is an asset; the expired portion is accounted for in expenses.

e) Owner's Drawings

- R2,000 withdrawal reduces owner's equity but does not appear on the income statement.

- Preparing the Adjusted Entries

| Adjustment | Debit (R) | Credit (R) |

|-----|-----|-----|

| Salaries Expense | 500 | |

| Salaries Payable | | 500 |

| Depreciation Expense ? Furniture & Fittings | 2,000 | |

| Accumulated Depreciation ? Furniture & Fittings | | 2,000 |

| Insurance Expense | 1,200 | |

| Prepaid Insurance (asset) | | 1,200 |

- Preparing the Income Statement

Revenue:

- Sales = R70,000

Less:

- Cost of Goods Sold (COGS): Opening Inventory + Purchases ? Closing Inventory

Assuming:

- Opening Inventory = R8,000 (from trial balance)

- Purchases = R50,000

- Closing Inventory = R7,000

Calculation:

COGS = R8,000 + R50,000 ? R7,000 = R51,000

Gross Profit = R70,000 ? R51,000 = R19,000

Expenses:

- Salaries Expense: R5,000 + R500 (accrued) = R5,500
- Rent Expense: R3,000
- Insurance Expense: R1,200
- Depreciation Expense: R2,000

Total Expenses = R5,500 + R3,000 + R1,200 + R2,000 = R11,700

Net Profit = R19,000 ? R11,700 = R7,300

- Preparing the Balance Sheet

Assets:

- Cash: R10,000
- Accounts Receivable: R15,000
- Inventory: R7,000 (closing stock)
- Furniture and Fittings: R20,000 ? R2,000 (depreciation) = R18,000
- Prepaid Insurance: R1,200

Liabilities:

- Accounts Payable: R12,000
- Salaries Payable: R500

Owner's Equity:

- Capital + Net Profit ? Drawings

Assuming initial capital is R35,000:

- Adjusted Capital = R35,000 + R7,300 (net profit) ? R2,000 (drawings) = R40,300

Total Assets = Total Liabilities + Owner's Equity

It aims to evaluate students' ability to apply theoretical concepts in practical scenarios, similar to how real-world accounting functions.

This example typically involves a set of transactions that occurred over a specific period, requiring students to:

- Record transactions accurately
- Post to appropriate ledger accounts

- Prepare a trial balance
- Make adjusting entries
- Finalize the financial statements

The example's complexity is calibrated to test students' grasp of core concepts while encouraging methodical problem-solving.

Key Components of the June 2014 Example

Scenario and Transactions

The example presents a brief narrative of a business's activities during a particular period, often including:

- Purchases and sales of goods
- Cash and credit transactions
- Expenses and incomes incurred
- Capital introduced or withdrawn

For instance, the scenario might involve a retail business that starts the month with certain capital, makes purchases on credit, makes cash sales, pays rent, and incurs other expenses.

Typical transactions may include:

- Goods purchased on credit from suppliers
- Cash sales of goods
- Payment of expenses such as wages, rent, and utilities
- Capital investment or withdrawal
- Goods returned by customers or suppliers

Understanding these transactions' nature is vital, as they determine the correct journal entries and ledger postings.

Types of Journal Entries

The example emphasizes the importance of proper journalizing, including:

- Sales and purchases

- Returns and allowances
- Payments and receipts
- Adjustments for accrued or prepaid expenses

Students are expected to identify the correct accounts affected and record transactions using proper debit and credit formats.

Ledger Accounts and Posting

Postings to ledger accounts are critical for tracking individual account balances. The example provides a list of ledger accounts, such as:

- Cash
- Accounts receivable
- Inventory
- Purchases
- Sales
- Expenses (Wages, Rent, Utilities)
- Capital and Drawings

Students must accurately transfer journal entries into these ledgers, ensuring that the debit and credit sides are correctly maintained.

Trial Balance Preparation

A trial balance is derived from the ledger balances, serving as a check for accuracy. The example guides students through calculating the balances of all ledger accounts, then listing them in the trial balance to verify that total debits equal total credits.

Adjusting Entries

Adjustments are necessary for accrued incomes, accrued expenses, prepaid expenses, and depreciation. The example emphasizes understanding when and how to make such adjustments, which are vital for presenting a true and fair view of the business's financial position.

Financial Statements

Finally, the example culminates in preparing:

- Income Statement (Profit and Loss Account)
- Balance Sheet (Statement of Financial Position)

These statements synthesize all the accounting data into a comprehensive overview of the business's performance and financial health.

Deep Dive into the Example: Step-by-Step Analysis

Step 1: Analyzing the Transactions

The first step involves carefully reading the provided transactions. For example:

- "Purchased goods worth \$5,000 on credit from Supplier A."
- "Made cash sales of \$2,000."
- "Paid wages of \$300 in cash."
- "Withdrew \$1,000 cash for personal use."

Students should classify each transaction to understand which accounts are affected and whether they are increases or decreases.

Step 2: Recording Journal Entries

Using the transaction analysis, students are expected to record journal entries systematically, for example:

Date	Particulars	Dr.	Cr.
-----	-----	-----	-----
xx/xx	Purchases A/C	\$5,000	
	To Accounts Payable A/C		\$5,000
xx/xx	Cash A/C	\$2,000	
	To Sales A/C		\$2,000

Proper journalization ensures accuracy and clarity in subsequent steps.

Step 3: Posting to Ledger Accounts

Students should transfer each journal entry to the respective ledger accounts, maintaining the T-account format. For example, the "Purchases" ledger will show a debit of \$5,000, and "Accounts Payable" will show a credit of the same amount.

Step 4: Calculating Balances and Preparing the Trial Balance

Once all postings are complete, students calculate the ending balances in each ledger account. These balances are then listed in the trial balance, verifying that total debits equal total credits.

Step 5: Making Adjusting Entries

Adjustments may include:

- Accrued expenses (e.g., wages earned but not paid)
- Prepaid expenses (e.g., insurance)
- Depreciation on fixed assets

For example, if wages of \$50 are accrued but not yet paid, an adjusting entry would be:

Particulars	Dr.	Cr.
----- ----- -----		
Wages Expense	\$50	
To Wages Payable		\$50

Step 6: Finalizing Financial Statements

Using the adjusted trial balance, students prepare the income statement by summing revenues and deducting expenses to find net profit or loss. The balance sheet reflects assets, liabilities, and equity at the period's end, ensuring all figures are accurate and balanced.
