Introduction to Eurocodes and the Pocket Book Concept

What Are Eurocodes?

Eurocodes are a set of harmonized technical standards developed by the European Committee for Standardization (CEN) to facilitate the design and assessment of buildings and civil engineering works across Europe. They cover various aspects of structural design, including actions (loads), materials, and specific design approaches for diverse structures such as concrete, steel, masonry, timber, and geotechnical works.

The primary goal of Eurocodes is to promote safety, durability, and sustainability by providing a unified framework that ensures consistency and quality across member states. Their adoption streamlines cross-border projects, simplifies regulatory compliance, and fosters innovation.

The Need for a Pocket Reference
