- Introduction to Economics

Definition and Nature of Economics

- Economics is the social science that studies how individuals, firms, and governments make choices to allocate limited resources to satisfy unlimited wants.
- It is both a science (systematic study) and an art (application in real life).

Scope and Importance

- Microeconomics: focuses on individual units like households and firms.
- Macroeconomics: deals with the economy as a whole, including issues like inflation, unemployment, and economic growth.

- Basic Concepts and Principles

Wants, Needs, and Goods

- Wants are unlimited desires; needs are basic requirements.
- Goods are tangible products satisfying wants or needs.

Scarcity and Choice

- Resources are limited, leading to the necessity of choosing among alternatives.

Opportunity Cost

- The value of the next best alternative foregone when making a decision.
- Demand and Supply Analysis

Law of Demand

- With other factors constant, as the price of a good decreases, demand increases, and vice versa.

Law of Supply

- As the price of a good increases, supply increases, and vice versa.

Market Equilibrium

- The point where demand equals supply, establishing the market price and quantity.
- Elasticity of Demand and Supply
- Measures responsiveness of quantity demanded or supplied to changes in price.
- Types include price elasticity, income elasticity, and cross elasticity.
- Consumer Behavior and Utility

- Concepts of total, marginal, and average utility.
- The theory of consumer choice explains how consumers maximize satisfaction within their budget constraints.

Microeconomic Foundations in BBS Notes

Microeconomics forms a significant part of the first-year syllabus, focusing on individual economic agents and their interactions.

- Theory of the Firm

Types of Markets

- Perfect Competition
- Monopoly
- Monopolistic Competition
- Oligopoly

Production and Costs

- Factors of Production: land, labor, capital, entrepreneurship.
- Short-run and long-run costs.

- Price Determination

- How prices are set in different market structures.
- Role of demand and supply in price determination.
- Price elasticity in different market conditions.

- Market Failures and Government Intervention

- Externalities, public goods, and information asymmetries.
- Policies to correct market failures, such as taxes, subsidies, and regulation.

Macroeconomic Perspectives in BBS Notes

While microeconomics zooms in on individual units, macroeconomics provides a broader view of the economy's overall functioning.

- National Income and Output

Concepts of GDP, GNP, and NNP

- Gross Domestic Product (GDP): total value of goods and services produced within a country.
- Gross National Product (GNP): GDP plus net income from abroad.
- Net National Product (NNP): GNP minus depreciation.

Methods of National Income Calculation

- Production Method
- Income Method
- Expenditure Method

- Unemployment and Inflation

- Types and causes of unemployment.
- Inflation: demand-pull and cost-push.

- Fiscal and Monetary Policies

- Government spending, taxation, and borrowing.
- Central bank operations, interest rates, and money supply management.

- Economic Growth and Development

- Factors influencing growth.

- Indicators of development like HDI (Human Development Index).

Practical Applications and Analytical Skills from the Notes

The BBS first-year notes emphasize not just memorization but also application and analysis. For example:

- Analyzing how changes in government policy affect market equilibrium.
- Evaluating the impact of inflation on consumers and businesses.
- Understanding real-world issues such as unemployment rates and economic crises through theoretical lenses.

Developing these analytical skills is vital for exams and future careers in business, finance, and policy-making.
