Regulatory Framework Governing Citation XLS Type Ratings

Different aviation authorities impose specific rules for obtaining a type rating for the Citation XLS. While the core principles are similar globally, nuances exist.

FAA (United States)

- The FAA mandates a Type Rating for aircraft with a maximum gross takeoff weight (MTOW) over 12,500 pounds.
- The process involves completing an FAA-approved training program, including ground school, simulator training, and flight training.
- Candidates must pass written knowledge tests and practical flight examinations (check rides).

EASA (European Union)

- Similar to the FAA, EASA requires a type rating for aircraft exceeding 5,700 kg (approximately 12,566 pounds) MTOW.
- The training encompasses theoretical knowledge, simulator sessions, and flight training.
- The certification process also involves strict assessments by certified examiners.

Other Jurisdictions

- Many countries adopt standards aligned with ICAO (International Civil Aviation Organization) recommendations.
- Requirements can vary, with some nations offering simplified pathways for pilots already holding other type ratings or extensive experience.

Components of a Typical Cessna Citation XLS Type Rating Program

Obtaining a type rating involves a comprehensive curriculum designed to ensure pilots are proficient with all facets of the aircraft.

1. Theoretical Ground School

- Aircraft systems overview (avionics, engines, electrical, hydraulic, environmental)
