Understanding Your Hair Type and Needs

Before diving into hair care routines, it's crucial to understand your hair type, as this influences your product choices and styling methods. Hair types are generally categorized based on texture, porosity, and scalp condition.

Hair Texture and Classification

- Wavy Hair (Type 2): Ranges from loose waves to more defined, S-shaped waves. Can be prone to frizz.
- Curly Hair (Type 3): Well-defined curls that require moisture and gentle handling.
- Coily/Kinky Hair (Type 4): Tightly coiled or zig-zag pattern. Usually drier and more fragile.

Porosity and Its Impact

- Low Porosity: Hair cuticles are tightly closed, making it resistant to moisture. Needs gentle, hydrating products.
- Normal Porosity: Balanced moisture absorption and retention.
- High Porosity: Cuticles are raised or damaged, leading to dryness and frizz. Requires deep conditioning and sealing.

Scalp Condition

- Oily Scalp: Needs balancing cleansing routines.
- Dry or Sensitive Scalp: Benefits from gentle, hydrating products.

- Dandruff or Flakiness: May require medicated shampoos and scalp treatments.

Tip: Conduct a simple strand test or consult a hair care professional to determine your hair type and scalp condition accurately.
